

Low Stress Boarding!

Our cat condos are secluded providing a nice quiet environment. Feliway pheromones are plugged in always to help reduce stress.

Cats need to stretch - our facility allows them to come out and play!

Cat Boarding

Cat Condos are located away from our dog guests to ensure a relaxing and quiet stay within a large, sound-proof play room.

The large play area is equipped with two climbing posts, as well as a tunnel to accommodate social cats who enjoy a lot of space to roam and play. Cats may stay in their condos during their stay if they prefer their own space.

Condos are temperature controlled, and equipped with comfy blankets and an interactive Cat Web camera to see your pet play and enjoy their stay.

Daycare Indoor & Outdoor

Our doggie daycare offers a fun and social play environment for your pets to get out their energy and exercise all day!

We offer indoor and outdoor play.

Our outdoor play is shaded, with misters and kiddie pools. We can accommodate any size dog in our spacious play areas. The pets are separated by size and personality.

Our daycare has constant supervision with specially designed equipment for our furry friends. Daycare supervisors interact with the animals throughout the day playing, feeding, and giving love to our furry guests!

All pets that would like to attend our day care must be social with other pets and have no history of aggression. Owners must fill out a pet personality form to rate your pet's compatibility. Daycare supervisors will assess each pet at time of arrival.
